## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant's election without traverse of Group I (claims 30-36, 54-55 and 57-59) in the reply filed on 06/30/06 is acknowledged.

### ***Response to Arguments***

Applicant's arguments with respect to claims 30-36, 54-55 and 57-59 have been considered but are moot in view of the new ground(s) of rejection.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 30, 54, and 57 are rejected under 35 U.S.C. 102(b) as being anticipated by DiGiovanni et al. (5237576). Col.2, l.23-34 discloses a method of stabilizing a short-pulse fiber laser (col.4, l.64-65), comprising:

isolating said fiber laser in a temperature-controlled enclosure (compact package) from an external environment; and operating the fiber laser within the enclosure while utilizing the enclosure to stabilize a repetition rate of the fiber laser (it is inherent that since the compact package of the fiber laser reduces its susceptibility to temperature fluctuations and therefore the repetition rate is also stabilized) .

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 31-32, and 58-59 are rejected under 35 U.S.C. 103(a) as being unpatentable over DiGiovanni et al. (5237576) in view of Takara et al. (5646774).

With respect to claim 31, DiGiovanni et al. disclose all limitations of the claims except for the fiber laser being wrapped onto a fiber spool.

Takara et al. teach the fiber laser is wrapped onto a fiber spool 23 in Fig.5A.

it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide DiGiovanni et al. what is taught by Takara et al. in order to change the optical path length of the fiber laser.

With respect to claim 32, it is understood that the thermal expansion of the fiber spool must be matched to the optical fiber. Otherwise, the optical fiber laser would not operate properly.

With respect to claim 58, Takara et al. disclose in Fig.5A and col.8, l.7-15 a piezoelectric transducer and a power supply 35 and col.8, l.32-35 disclose the rep. rate is controlled.

Art Unit: 2828

With respect to claim 59, Takara et al. disclose in Fig.1 and col.4, l.44-55 a phase lock loop circuit.

*Allowable Subject Matter*

Claims 33, 36 and 55 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
